- The instructor was excellent in this regard -- he was able to make issues seem both important and interesting, and this in turn generated worthwhile class discussions.

- good, readings were excellent
- The grade is mostly based on a paper where we had to come up with our own topic and do our own research, so there was a lot of encouragement of independent thought.

- Overall this was a great course. A strength is the effective combination of economic concepts with health issues that resulted in interesting classes each week. I cannot honestly think of many weaknesses.
- I hate to suggest work for future generations -- but I would really have benefitted from some background econ reading early in the semester. There was no reading for the first three weeks -- he just lectured on statistics, etc. I would have gotten a lot more out of those lectures if I had come to class prepared to engage with the material -- instead of having to put it all together on the fly.

- Overall, this class was very enjoyable and informative.
- Klick seems to be a very nice person. I have to comment on one odd quirk. He seems overly interested in academic status/prestige. Every time he introduced an article he gave a quick bio of the author along with a nickname suggesting familiarity and a ranking (top 2, top 3, etc) of where the author stands in the field of health economics. Just strange and doesn't fit with the rest of his personality.
